
BEST 80 ENGINEERING CAPSTONE PROJECT TOPICS IDEAS

1. Paper battery
2. Embedded web technology
3. Blue eyes technology
4. Design of a communication network
5. Mobile communication smart antenna
6. A study about night vision technology
7. A study of traffic pulse design
8. Smart note taker
9. Artificial passenger
10. Latest on touch screen technology
11. Biosensors
12. What is a space mouse
13. Aeronautical communications
14. The latest about air cars
15. Smart dust core architecture
16. What is an embedded system?
17. Biometric technology
18. What is an agent assisted programming?
19. Fruit picking robot
20. Railway tracks and power generation
21. What is GPS and its application
22. Car monitoring system
23. Bench tapping machine
24. Debugging
25. Smart tuning mechanism
26. What are artificial eyes
27. Windmill water pump
28. Flexible drilling machine
29. Latest on a hydraulic car lift
30. Green house design

31. Mini RC car
32. Sunlight and fuel generation
33. Baseball playing mini robots
34. Windmill model
35. Waste management machine
36. BICMOS technology
37. The latest on tsunami warning system
38. Bio-magnetism
39. Autonomic computing
40. Solar powered bag
41. Coin based vending machine design
42. Windmill turbine kites
43. Remote control aircraft
44. The latest about e-bike and steam power
45. Generation system of a windmill
46. Water pump
47. How to build a wind mill pump
48. Minor tank irrigation
49. Solar powered bright or dim controller
50. Turbine generator
51. The latest on augmented reality
52. Solar powered pumping station
53. Motion sensing on an e-skateboard
54. Steam engine design
55. Water filter and pedal power
56. Synchronesh gear
57. Unburned bricks
58. Irrigation tank restoration
59. Urban planning and engineering
60. Water powered generator

61. Buildings and climate control
62. Ventilation system and air exchanger
63. Water heater and bio gas
64. Juicer grinder – pedal powered
65. Large constructions
66. Fracture and damage mechanics
67. Steel, glass and concrete structures
68. Biomedical engineering
69. Complex dynamical systems control
70. Electrical power systems
71. Engines and alternative fuels
72. Medical device design
73. Material modeling on a multi-scale level
74. Renewable energy
75. Maritime technology and metals science
76. Electronics devices and electronics
77. Signal processing
78. Concrete technology
79. Biofluid and tissue mechanics
80. Machinery and sustainable energy
